Data Analysis, Machine Learning, Data Visualization, Statistical Modeling, Python, R, SQL, NoSQL, Cloud Computing, AWS, Azure, GCP, Docker, Power BI, Tableau, Predictive Analytics, Deep Learning, TensorFlow, React, Flask, Web Development

Summary

I am a dedicated Data Scientist with a Master's degree in Data Science & Optimization, and a Bachelor's degree in Industrial Engineering. My professional experience spans various industries, where I have successfully implemented data-driven solutions to optimize operations and enhance decision-making processes. I combine expertise in machine learning with full-stack development capabilities to create comprehensive solutions.

Professional Experience

Revelo

Remote

LLM PR Reviewer & Annotation Specialist

Nov 2025–2026

- Evaluated and provided human preference feedback on LLM-generated production-ready code through comparative analysis of dual model outputs, ensuring code quality met professional software engineering standards.
- Conducted comprehensive code reviews across Python repositories, assessing solutions against multiple criteria including logic/correctness, naming/clarity, organization/modularity, interface design, error handling, and documentation quality.
- Collaborated with AI models iteratively to guide code improvements through structured feedback, similar to peer code review processes, ensuring implementation of software engineering best practices including proper testing, documentation, and commit practices.
- Analyzed and documented detailed pros/cons for competing model responses across various dimensions, contributing to training data for improving AI coding capabilities.

Magno Home & Towers

Full Stack Developer

2024–2025

- Developed and deployed a comprehensive web platform for condominium management using React, Flask, and SQLAlchemy, implementing features such as common area reservations, maintenance reporting, and complaint management systems.
- Implemented secure user authentication using JWT and integrated with AWS services (Elastic Beanstalk, RDS with PostgreSQL) for robust deployment and scalability.
- Designed and implemented responsive UI using Tailwind CSS, ensuring optimal user experience across devices.

Universidad Autónoma de Coahuila

Research Data Scientist

2021–2023

- Led a research project on short-term domestic energy consumption prediction using machine learning, supported by CONAHCYT (National Council of Humanities, Sciences, and Technologies).
- Developed and implemented various ML and DL models (XGBoost, LSTM, GRU, Seq2Seq) for time series prediction, achieving optimal performance for different prediction intervals.
- Created a real-time data collection system using Raspberry Pi and smart meters, integrating with MongoDB Atlas for data storage and OpenWeather API for environmental data.
- Designed and implemented an interactive dashboard for visualizing consumption patterns and model predictions, including cost and emissions estimates.

Datum

Data Analyst

2019–2021

- Automated tasks using Python, performed statistical analysis, and generated KPIs with R-project, which reduced data processing time by 30%, improving reporting accuracy.
- Conducted ETL processes and managed SQL and NoSQL databases, ensuring data consistency and improving query performance by 20%.
- Collaborated with cross-functional teams to identify data needs, providing actionable insights, enhancing team productivity and project outcomes.

KSR S. de R.L de C.V.

Quality Assurance Analyst 2018–2019

- Validated automotive part dimensions against specifications using standard procedures, which reduce the defect rate by 15%, enhancing overall product quality.
- Demonstrated strong attention to detail and problem-solving skills by identifying and resolving quality issues promptly, improving production efficiency.

Schneider Electric

Information Analyst 2016–2017

- Analyzed historical data to identify energy consumption trends, achieving an overall reduction of 10% in energy expenses for company customers.
- Utilized effective communication skills to present findings and recommendations to stakeholders, facilitating informed decision-making.

Education

Universidad Autónoma de Coahuila

M.S. in Data Science and Optimization 2021–2023

Thesis: "Short-Term Domestic Energy Consumption Prediction using Machine Learning"

Instituto Tecnológico de Saltillo

B.Eng. in Industrial Engineering with Specialization in Manufacturing Systems 2010–2015

Skills

Programming Languages: Python (5 years), R-project (3 years), JavaScript/React (1 year)

Database Management: MySQL (3 years), PostgreSQL (2 years), MongoDB (2 years)

Containerization and Cloud Services: Docker (2 years), AWS (2 years), Microsoft Azure (1 year)

Web Development: React, Flask, SQLAlchemy, Tailwind CSS, JWT Authentication

Languages

English: Professional proficiency 80%

Spanish: Native

Certifications and Licenses

2025: Google Data Analytics Professional Certificate

2025: Google Cloud Computing Foundations Certificate

2022: AWS Solutions Architect

2021: Microsoft Certified: Azure Fundamentals

2020: AWS Cloud Practitioner
