Summary

Data Scientist and Full-Stack Developer with 5+ years of experience turning data into decisions and shipping production software, across research, industry, and independent SaaS product ownership. M.S. in Data Science & Optimization and a B.Eng. in Industrial Engineering. Combines machine learning and statistical modeling (Python, R, TensorFlow) with modern web development (React, Node.js, Flask) and cloud deployment (AWS, Azure, GCP, Docker) to build end-to-end, data-driven products.

Experience

Revelo

Remote

LLM PR Reviewer & Annotation Specialist

Nov 2025–Present

- Evaluate LLM-generated production code through comparative human-preference reviews, scoring correctness, clarity, and design against professional engineering standards.
- Guide iterative model improvements through structured feedback, contributing detailed pros/cons analysis used as training data for AI coding capabilities.

Adminproviv — Condominium Management SaaS

Saltillo, Mexico

Full-Stack Developer & Product Owner

2025–Present

- Architected and deployed a production SaaS platform serving multiple residential condominiums, evolving it from a static prototype into a full-stack, mobile-first app.
- Built the backend in Node.js, Express, and SQLite (WAL mode) on Railway, with JWT authentication, role-based access control, and REST APIs across seven modules.
- Shipped eight end-to-end feature modules — patrol checklists, maintenance planning, supply requisitions, finance, and more — with an offline-first frontend that syncs on reconnect for on-site mobile use.
- Implemented client- and server-side PDF/Excel export pipelines; currently building an executive KPI dashboard for condominium boards.

Magno Home & Towers

Full-Stack Developer

2024–2025

- Built a condominium management platform with React, Flask, and SQLAlchemy, covering reservations, maintenance reporting, and complaint management.
- Deployed on AWS (Elastic Beanstalk, RDS/PostgreSQL) with JWT authentication and a responsive Tailwind CSS interface.

Universidad Autónoma de Coahuila

Research Data Scientist

2021–2023

- Led a CONAHCYT-funded research project on short-term domestic energy consumption forecasting using ML/DL models (XGBoost, LSTM, GRU, Seq2Seq).
- Built a real-time data pipeline (Raspberry Pi smart meters, MongoDB Atlas, OpenWeather API) and an interactive dashboard for consumption and emissions insights.

Datum

Data Analyst

2019–2021

- Automated reporting and statistical analysis with Python and R, cutting data processing time by 30% and improving accuracy.
- Managed ETL processes across SQL/NoSQL databases, improving query performance by 20% and delivering cross-functional insights.

KSR S. de R.L. de C.V.

Quality Assurance Analyst

2018–2019

- Validated automotive part dimensions against spec, reducing the defect rate by 15% through rigorous quality control.

Schneider Electric

Information Analyst

2016–2017

- Analyzed energy consumption trends and presented findings to stakeholders, cutting customer energy expenses by 10%.

Education

Universidad Autónoma de Coahuila

M.S. in Data Science and Optimization

2021–2023

Thesis: “Short-Term Domestic Energy Consumption Prediction using Machine Learning”

Instituto Tecnológico de Saltillo

B.Eng. in Industrial Engineering, Manufacturing Systems

2010–2015

Skills

Languages: Python, R, JavaScript/TypeScript, SQL

ML & Data Science: TensorFlow, XGBoost, Statistical Modeling, Predictive Analytics, Deep Learning

Web & Backend: React, Flask, Node.js/Express, JWT Authentication

Databases: MySQL, PostgreSQL, MongoDB, SQLite

Cloud & DevOps: AWS, Azure, GCP, Docker

Visualization: Power BI, Tableau, Chart.js

Languages

English: Professional proficiency

Spanish: Native

Certifications

2025: Google Data Analytics Professional Certificate

2025: Google Cloud Computing Foundations Certificate

2022: AWS Solutions Architect

2021: Microsoft Certified: Azure Fundamentals

2020: AWS Cloud Practitioner
